

Network Disclosure Announcement No. 287

Public Notice of Network Change(s), Pursuant to CFR 47, subsections 51.325 - 51.335.
Qwest's Internet address: <http://www.qwest.com/disclosures>.

INFORMATIONAL ANNOUNCEMENT (Information for Customer Premises Equipment Manufactures and Enhanced Services Providers):

Advanced Intelligent Network Feature (AIN) & AIN Interaction Summary for Single Number Service (SNS)-Basic, Updated: 07/05/02

Disclosure Date: April 22, 1996

Summary:

QWEST will be offering several new services, which will make use of the Advanced Intelligent Network (AIN). The AIN uses the switching network infra-structure and its internal signaling capabilities. Since the AIN is still evolving, new services will, for a time, adversely impact other features, services, and functionality's currently being offered by QWEST.

These interactions can not be corrected by making changes to Customer Premises Equipment or by any change in the manner in which an Enhanced Services Provider interconnects with the QWEST basic network.

SingleNumber Service (SNS) – Basic provides a single telephone number to customers with multiple business locations. Subscribers may use this single number to provide one publicized access number for multiple business locations.

Attached are the known interactions to date for SingleNumber Service (SNS) – Basic on NorTel DMS switches equipped with AIN 0.1 and using a Virtual Termination Attempt Trigger (VTAT).

Location of Deployment:

QWEST currently plans to deploy SingleNumber Service – Basic in Arizona, Colorado, Idaho, Iowa, Minnesota, Nebraska, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming.

Additional Information:

For the most current listing of interactions and estimated resolution dates, or; to notify Qwest of any identifiable problem encountered with these AIN services, please contact:

Ms. Connee Moffatt
Manager – Network Planning
700 W. Mineral, MN G15.7
Littleton, CO 80120
303-707-7119
