

Actiontec® 1520 and 1524

How to Block Internet Services

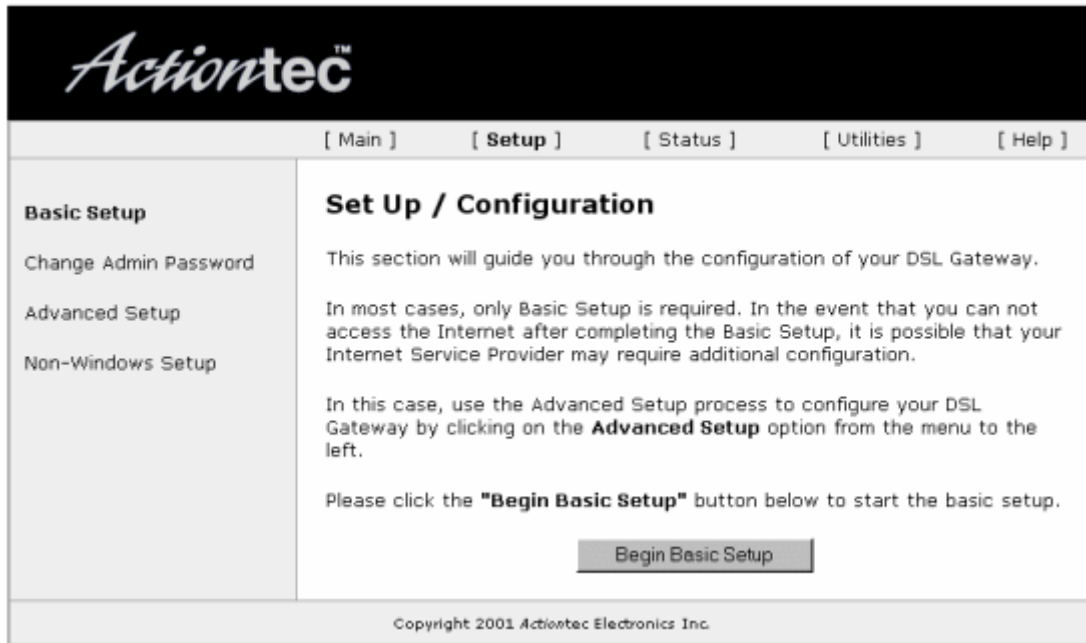

1. Open your Web browser (Microsoft® Internet Explorer or Netscape®). In the location or address bar, type **192.168.0.1**. Select **Enter**.

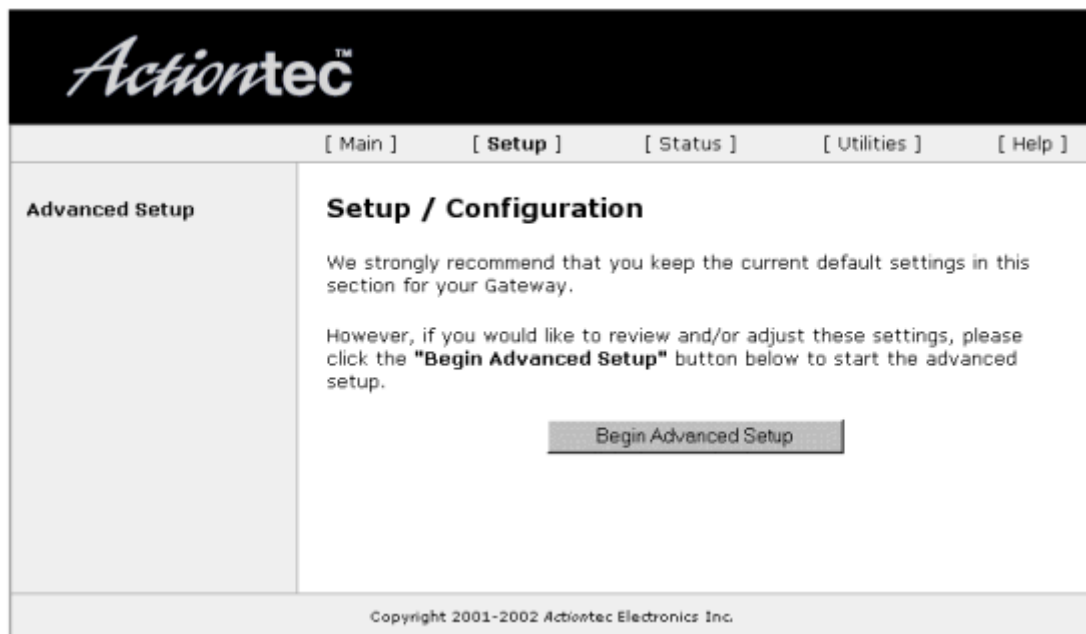

2. Select **Setup / Configuration**.

3. Select **Advanced Setup** from the options on the left.

4. Select the **Begin Advanced Setup** button.

5. Select the options you want. Select **Next**. Then select **Save and Restart** in the bottom left of the screen.

The screenshot shows the Actiontec web interface. At the top left is the Actiontec logo. Below it is a navigation bar with links: [Main], [Setup], [status], [Utilities], and [Help]. On the left side, there is a sidebar menu under the heading "Advanced Setup" with the following items: WAN IP Address, Wireless Settings, LAN IP Address, DHCP Server, Services Blocking (which is highlighted), Website Blocking, VPN Pass Through, Remote Management, Port Forwarding, DMZ Hosting, Firewall, Dynamic Routing, NAT, Static Routing, and MAC Address Cloning. Below the sidebar is a "Save and Restart" button. The main content area is titled "Services Blocking" and contains the following text: "To block Internet Services from a computer on your network, enter the computer's IP address below and select the Internet Services that you would like to block." Below this text is a form with an "IP Address:" label, a text input field, an "Add" button, and a "Blocked IP Address List:" label with a list box. Below the list box is a "Remove" button. Underneath is the "Internet Services Blocked" section with checkboxes for Web, FTP, Newsgroups, E-mail, and IM. The "Netmeeting" section has an "IP:" label, a text input field, and radio buttons for "On" and "Off". At the bottom of the main content area are "Back" and "Next" buttons. The footer of the page reads "Copyright 2001-2002 Actiontec Electronics Inc."

6. Select **Save and Restart**.

7. When the power LED stops flashing, the configuration is complete.
