

## Qwest® Advanced Networking Modem with Wireless: 2Wire® 2700 HG

### Firewall Monitor How to Enable E-mail Notification

The Qwest® Advanced Networking Modem with Wireless: 2Wire® 2700 HG Firewall Monitor enhanced service extends the professional-grade firewall capabilities of your wireless gateway by continuously assessing threats to your home network.

The Firewall Monitor service appears as an option on your Qwest Advanced Networking Modem with Wireless (2Wire 2700 HG) home page.

E-mail notification alerts you when one of your attack threshold rules has been exceeded.

1. To receive an e-mail notification, check the **E-mail Notification Enable** checkbox.

**Email Notification**

 Click **ENABLE** to be notified via email when any of the above conditions are met. Then enter the SMTP server information and the email address at which you would like to receive notification messages. A test message will automatically be sent each time these settings are changed.

2. If required by your service, enter your **Outgoing SMTP Email Server Address, Username, Password,** and the **E-mail Address** where alerts should be sent.

### Edit Attack Notification Settings

Settings

**Attack Notification**  
 **Enable** Check ENABLE for Firewall Monitor attack notification.

---

**Set Notification Rules**  
Choose up to three situations which will cause a notification message to appear on the system summary page.

- At least   attack(s) in
- At least   attack(s) in
- At least   attack(s) in

---

**Email Notification**  
 **Enable** Click ENABLE to be notified via email when any of the above conditions are met. Then enter the SMTP server information and the email address at which you would like to receive notification messages. A test message will automatically be sent each time these settings are changed.

Outgoing SMTP Email Server Address:
