

Qwest® Advanced Networking Modem with Wireless: 2Wire® 2700 HG

Firewall Monitor How to Configure Notification Rules

The Qwest® Advanced Networking Modem with Wireless: 2Wire® 2700 HG Firewall Monitor enhanced service extends the professional-grade firewall capabilities of your wireless gateway by continuously assessing threats to your home network.

The Firewall Monitor service appears as an option on your Qwest Advanced Networking Modem with Wireless (2Wire 2700 HG) home page.

To receive attack notification messages on the Qwest Advanced Networking Modem with Wireless (2Wire 2700 HG) home page, you must configure up to three notification rules. The following screen shows the default rules.

Set Notification Rules

Choose up to three situations which will cause a notification message to appear on the system summary page.

• At least High Risk attack(s) in

• At least Medium Risk attack(s) in

• At least attack(s) in

Each rule contains the following parameters:

- **Number of Attacks** - Select the quantity of attacks (1, 5, 10, 15, 25, 50, and 100) that must occur before notification is sent.
- **Type of Attack** - Select the type of attack for this notification rule (high risk, medium risk, and low risk attacks).
- **Time Duration** - Select the time duration (one day or one week). A week is defined as midnight Monday to midnight Sunday. You receive notification if the number of attacks specified exceeds the chosen duration.
