

Qwest iQ Networking™

iQ makes technology work for you

Qwest iQ Networking simplifies complex data communications by uniting your mission-critical business applications with our OC-192 application-aware networking environment. Qwest® constructs flexible solutions that transcend the underlying technologies, permitting universal access to a converged networking environment. This is all designed around your specific needs, and backed by industry-leading service level agreements (SLAs).

Qwest iQ Networking™ consists of a secure, managed, fully interoperable and scalable suite of global, IP-based wide area network (WAN) services. It is based on high performance platforms designed to focus your specific business and application requirements. The service includes Qwest iQ Networking port types, multiple access methodologies, quality of service (QoS) capabilities, security services, integrated customer premises equipment (CPE) solutions, international connectivity, Network Management Services (NMS), the Qwest Control™ Web-based management tool and much more. Qwest iQ Networking delivers integrated network platform solutions in response to your unique buying preferences and existing networking equipment and legacy network environment—all driven from your specific requirements.

Qwest iQ Networking is modular, enabling you to implement solutions tailored to your specific business requirements. Your current networking investments are protected since you are able to use your existing customer premises equipment (CPE). Qwest iQ Networking makes it easy for you to design multi-node, any-to-any intranets or extranets that extend secure connectivity to remote locations, trusted vendors and suppliers as well as to customers.

iQ enables your business applications

As you use the benefits of multimedia, such as Voice over IP, and other bandwidth-intensive applications, the need for an intelligent network to

securely support your mission-critical applications is vitally important. Qwest partners with you in a consultative, application-focused manner to provide responsive networking solutions, based on your bandwidth, security and quality of service requirements. Qwest iQ Networking can provide you peace of mind knowing that your data and applications are safe and secure.

Qwest iQ Networking puts building blocks in place to make your applications perform the way they were designed to perform. From security services and remote access, to robust hosting and diversity solutions, you can be confident that you have an applications-aware networking environment enhanced by a world-class support team.

iQ on your terms

Qwest can build a support model that fits your needs. An essential component of an intelligent network solution is your experience and expertise. Qwest listens to how you want your network solution to operate, and responds accordingly with end-to-end accountability. Qwest iQ Networking brings together a team of highly-trained professionals to provide you with a complete support solution with a human touch. From simple, easy one-call-resolve support procedures, to robust Web-based management and measurement tools, we bring it all together for you, on your terms.

iQ is your bridge to the future

As today's information economy continues to take shape, Qwest is powering the development of innovative communications solutions that are changing many things. Our comprehensive solution and consultative approach turns your requirements into a competitive advantage that will distinguish your business in the marketplace. Qwest understands that its future is dependent on your success. And we are committed to delivering a visionary communications solution that is as unique as your business.

Qwest iQ Networking is a suite of WAN services with domestic and international availability depending on services selected. Recurring fees vary depending on services ordered. Additional equipment may be required.
