

QWEST iQ™ REMOTE BACKUP

OVERVIEW

Qwest's iQ Remote Backup solution protects from data loss and allows businesses to safely store data over the Internet. Data is encrypted at the customer site and automatically backed up to a fully redundant storage location. Customers can customize their backup and schedule changes at any time through an easy to use web portal. It's quick to implement and allows customers to recover data when they need it.

YOUR CHALLENGES

QWEST CAPABILITIES

YOUR RESULTS

1 Insure business recovery and access to critical files no matter the scenario

2 Alleviate pressure on IT, network and financial resources

3 Ensure that data is securely backed up from a server or end user PC

4 Eliminate the risk of exposure from locally made hard copies & meet legal and internal regulations

- Web based restore
- Immediate availability

- Scale up or down as your data needs change
- Data Compression
- Sub-file "Delta Block" transmits only changed portions of the file

- Automatic scheduled backup
- Daily confirmation messages
- Flexible sub-account creation and management

- Industry recognized AES 256 bit data encryption
- Secure fully redundant Qwest CyberCenter® storage facilities

- Convenient access anytime, anywhere with an Internet connection
- Fast backup and restore across your network

- Saves you valuable network bandwidth
- Avoid investment in a premise based backup solution

- Backups happen consistently so you always have access to your data
- Greater control over your backup policies

- State of the art security for your data
- Meet legal requirements and regulations
- Peace of mind - you know your data is protected

A GROWING NEED FOR RELIABLE BACKUP

- Of survey respondents, 76% of companies have declared a disaster or experienced a major business disruption.
Forrester/Disaster Recovery Journal October 2007 Global Disaster Recovery Preparedness Online Survey
- 60% of the companies surveyed had experienced a loss of confidential data just in the past year.
McAfee 2007 'Datagate: The Next Inevitable Corporate Disaster?'
